Camping by the pistes.

The main building and visitors' car park will be located in the centre of the new Alpin Camping Mallnitz site. To the north, a 130m by 50m alpine meadow slopes gently down to the valley floor, which will become a ski slope in winter. The project aims to provide every camping pitch with water and wastewater removal, electricity, cable TV and WiFi facilities. There will also be drying rooms for skiing gear, a washing machine area and a dishwashing area. The children's playground is to follow shortly.

Niedermühlbichler Baugesellschaft m.b.H. is responsible for construction of the main building and the three facility blocks. Solid construction (vertically perforated bricks) will be used for the structures once the foundation slabs and built-in elements are complete. NMB is also coordinating the various specialised departments (carpentry, HVAC, internal plastering, etc.) and supporting the client with additional construction supervision.

Impressions

Image notes

1

Holiday among the peaks: a dream come true.

Rendering of the completed campsite showing the mobile homes, Alpine meadow and chalet village.

2

The first sod has been turned for the new project.

The ground-breaking ceremony for the pioneering project took place on 25 April 2019.
